The Seven Deadly Sins Text Seven Deadly Sins: an Introduction.... The Seven Deadly Sins Appendix Seven Deadly Sins:An Introduction to the History (ISBN: 52004902). 7 Deadly Sins:an Introduction to History of Religious Con Scholarly Community at the Early University of Paris Theologians, Education and Society, 1215-1248 Cambridge University Press
This book explores the ways in which theologians at the early University of Paris promoted the development of this new centre of education into a prominent institution within late medieval society. Drawing upon a range of evidence, including many theological texts available only in manuscripts, Spencer Young uncovers a vibrant intellectual community engaged in debates on such issues as the viability of Aristotle's natural philosophy for Christian theology, the implications of the popular framework of the seven deadly sins for spiritual and academic life, the social and religious obligations of educated masters, and poor relief. Integrating the intellectual and institutional histories of the Faculty of Theology, Young demonstrates the historical significance of these discussions for both the university and the thirteenth-century church. He also reveals the critical role played by many of the early university's lesser-known members in one of the most transformative periods in the history of higher education. **The Seven Deadly Sins Society and Evil Rowman & Littlefield** A study of sloth, lust, anger, pride, envy, gluttony, and greed. **Old English Lexicology and Lexicography Essays in Honor of Antonette DiPaolo Healey Boydell & Brewer** Essays demonstrating how the careful study of individual words can shed immense light on texts more broadly. **The Seven Deadly Sins Sayings of the Fathers of the Church Catholic University of America Press + ORM** "Read this not just for intellectual enjoyment but to discover a centuries-old, proven path for conquering your worst sins" (Brandon Vogt, author of Why I Am Catholic). Gluttony. Lust. Greed. Anger. Sloth. Envy. Pride. The capital vices are the gateway

drugs to countless sins. But where did this tradition come from? Unsurprisingly, it can be traced back to the teachings of the Church Fathers, whose words—included in this book—answer such questions as: So how do the capital sins spawn other vices in the soul? How does one cultivate the virtues that heal the soul from those vices? How are gluttony and lust related? What role does almsgiving have in soothing the passion of anger? As the path of the book descends through the vices, the words of the Fathers will assist readers in being more realistic about the attacks upon the soul. Edifying and medicinal, each chapter begins with vice and ends with virtue, so one's path through the chapters represents a sort of ascent out of sin and on to the road to righteousness. The text gives special attention to the thoughts of Augustine of Hippo, Evagrius of Pontus, John Cassian, Gregory the Great, and Maximus the Confessor. "An illuminating survey of the Church Fathers' wisdom on the capital vices that have burdened us since time immemorial." —Curtis A. Martin, Founder and CEO of FOCUS "A wonderfully helpful compendium of insights and advice from the Church Fathers . . . You will be astonished at how relevant and applicable is this ancient wisdom to the life of the modern-day Christian. Highly recommended." —James Martin, SJ, author of *Jesus: A Pilgrimage* **Medicine and the Seven Deadly Sins in Late Medieval Literature and Culture** *Springer* This book considers how scientists, theologians, priests, and poets approached the relationship of the human body and ethics in the later Middle Ages. Is medicine merely a metaphor for sin? Or can certain kinds of bodies physiologically dispose people to be angry, sad, or greedy? If so, then is it their fault? Virginia Langum offers an account of the medical imagery used to describe feelings and actions in religious and literary contexts, referencing a variety of behavioral discussions within medical contexts. The study draws upon medical and theological writing for its philosophical basis, and upon more popular works of religion, as well as poetry, to show how these themes were articulated, explored, and questioned more widely in medieval culture. **The Transmission of Affect** *Cornell University Press* The idea that one can soak up someone else's depression or anxiety or sense the tension in a room is familiar. Indeed, phrases that capture this notion abound in the popular vernacular: "negative energy," "dumping," "you could cut the tension with a knife." *The Transmission of Affect* deals with the belief that the emotions and energies of one person or group can be absorbed by or can enter directly into another. The ability to borrow or share states of mind, once historically and culturally assumed, is now pathologized, as Teresa Brennan shows in relation to affective transfer in psychiatric clinics and the prevalence of psychogenic illness in contemporary life. To neglect the mechanism by which affect is transmitted, the author claims, has serious consequences for science and medical research. Brennan's theory of affect is based on constant communication between individuals and their physical and social environments. Her important book details the relationships among affect, energy, and "new maladies of the soul," including attention deficit disorder, chronic fatigue syndrome, codependency, and fibromyalgia. **Reading Dante The Pursuit of Meaning** *Lexington Books* *Reading Dante: The Pursuit of Meaning* examines the problem of thematic coherence in Dante's *Divina Commedia*. Unlike many Dante scholars who maintain that the poem's unity is the account of a journey through the afterworld, Jesper Hede argues that a systematic parallel reading of the poem's three parts

(Hell, Purgatory, and Paradise) reveals that it is the vision of divine order that provides the poem with its thematic unity. **Ben Jonson and Envy** *Cambridge University Press* This book examines the centrality of envy in the works of Ben Jonson, Shakespeare's greatest literary rival. **Anchoritic Spirituality Ancrene Wisse and Associated Works** *Paulist Press* Sometime in the first quarter of the 13th century a number of works were written for anchoresses, women who lived as religious recluses in cells adjoining churches. The most influential is *Ancrene Wisse* (A Guide for Anchoresses), which discusses in great detail the daily life of the anchoress, both outer and inner. This work gives a detailed sense of a powerful and multi-faceted spirituality different from that of other mystics. **Eating Beauty The Eucharist and the Spiritual Arts of the Middle Ages** *Cornell University Press* "The enigmatic link between the natural and artistic beauty that is to be contemplated but not eaten, on the one hand, and the eucharistic beauty that is both seen (with the eyes of faith) and eaten, on the other, intrigues me and inspires this book. One cannot ask theo-aesthetic questions about the Eucharist without engaging fundamental questions about the relationship between beauty, art (broadly defined), and eating."—from *Eating Beauty* In a remarkable book that is at once learned, startlingly original, and highly personal, Ann W. Astell explores the ambiguity of the phrase "eating beauty." The phrase evokes the destruction of beauty, the devouring mouth of the grave, the mouth of hell. To eat beauty is to destroy it. Yet in the case of the Eucharist the person of faith who eats the Host is transformed into beauty itself, literally incorporated into Christ. In this sense, Astell explains, the Eucharist was "productive of an entire 'way' of life, a virtuous life-form, an artwork, with Christ himself as the principal artist." The Eucharist established for the people of the Middle Ages distinctive schools of sanctity—Cistercian, Franciscan, Dominican, and Ignatian—whose members were united by the eucharistic sacrament that they received. Reading the lives of the saints not primarily as historical documents but as iconic expressions of original artworks fashioned by the eucharistic Christ, Astell puts the "faceless" Host in a dynamic relationship with these icons. With the advent of each new spirituality, the Christian idea of beauty expanded to include, first, the marred beauty of the saint and, finally, that of the church torn by division—an anti-aesthetic beauty embracing process, suffering, deformity, and disappearance, as well as the radiant lightness of the resurrected body. This astonishing work of intellectual and religious history is illustrated with telling artistic examples ranging from medieval manuscript illuminations to sculptures by Michelangelo and paintings by Salvador Dalí. Astell puts the lives of medieval saints in conversation with modern philosophers as disparate as Simone Weil and G. W. F. Hegel. **The Apothecary's Chest Magic, Art and Medication** *Cambridge Scholars Publishing* 'The Apothecary's Chest: Magic, Art and Medication' was a one-day symposium held at the University of Glasgow on November 24, 2007. The symposium called for a discussion on the evolution of the notions of mysticism, knowledge and superstition in the way they are intertwined in both science and the literary imagination in the figure of healers such as the apothecary, the alchemist, the shaman. There were three main areas of interest. The first involved traditional perceptions of physicians, who combined knowledge and superstition and thus bordered, in their practices, on the sphere of the occult. The second theme, evolving

from the first, proposed an inquiry of the overlapping interests and processes of science, magic and prophecy, as well as of the implications and consequences of a privileged access to medical knowledge, while the third subject of discussion concentrated on the development of the symbolism of the healer in literature, history, philosophy of science, anthropology, theology, film and art. The twelve papers included in this volume, papers presented by doctoral candidates and young scholars from across a range of geographical regions and disciplines, result in a collection of approaches to an investigative field with topics ranging from mystical traits of mundane materials to the origins of the occult and gender struggles. The thirteenth and final essay included in the volume, Professor Bill Herbert's 'From Mere Bellies to the Bad Shaman', is an exploration of the modern role of the contemporary poet in the form of an extended conversation initiated at the closing of the conference, when Professor Herbert was asked to combine a poetry reading with a few observations on the relationship between the poet and the shaman.

Sins of the Fathers Moral Economies in Early Modern Spain *University of Toronto Press* Sins of the Fathers considers sins as nodes of cultural anxiety and explores the tensions between competing organizational categories for moral thought and behaviours, namely the Seven Deadly Sins and the Ten Commandments. Hilaire Kallendorf explores the decline and rise of these organizational categories against critical transformations of the early modern period, such as the accession of Spain to a position of world dominance and the arrival of a new courtly culture to replace an old warrior ethos. This ground-breaking study is the first to consider Spanish Golden Age comedias as an archive of moral knowledge. Kallendorf has examined over 800 of these plays to illustrate how they provide insight into aspects of early modern experience such as food, sex, work, and money. Finally, Kallendorf engages the theoretical terminology of Marxist literary criticism to demonstrate the inherent ambiguity of cultural change.

The Sin of Pride in "The Pardoner's Tale" *Stanford University Press* **In the Garden of Evil The Vices and Culture in the Middle Ages** *PIMS* **Cities of God The Religion of the Italian Communes, 1125-1325** *Penn State Press* **The Seven Deadly Sins in the Work of Dorothy L. Sayers** *Kent State University Press* An examination of the work of Dorothy L. Sayers, beginning with her early poetry and moving through her fiction to her dramas, essays and lectures. It illustrates how Sayers used popular genres to teach about sin and redemption, and how she redefined the seven deadly sins for the 20th century.

Addiction and Devotion in Early Modern England *University of Pennsylvania Press* Rebecca Lemon illuminates a previously-buried conception of addiction, as a form of devotion at once laudable, difficult, and extraordinary, that has been concealed by the persistent modern link of addiction to pathology. Surveying sixteenth-century invocations, she reveals how early moderns might consider themselves addicted to study, friendship, love, or God. However, she also uncovers their understanding of addiction as a form of compulsion that resonates with modern scientific definitions. Specifically, early modern medical tracts, legal rulings, and religious polemic stressed the dangers of addiction to alcohol in terms of disease, compulsion, and enslavement. Yet the relationship between these two understandings of addiction was not simply oppositional, for what unites these discourses is a shared emphasis on addiction as the overthrow of the will.

Etymologically, "addiction" is a verbal contract or a pledge, and even as sixteenth-century audiences actively embraced addiction to God and love, writers warned against commitment to improper forms of addiction, and the term became increasingly associated with disease and tyranny. Examining canonical texts including *Doctor Faustus*, *Twelfth Night*, *Henry IV*, and *Othello* alongside theological, medical, imaginative, and legal writings, Lemon traces the variety of early modern addictive attachments. Although contemporary notions of addiction seem to bear little resemblance to its initial meanings, Lemon argues that the early modern period's understanding of addiction is relevant to our modern conceptions of, and debates about, the phenomenon. **Middle English Literature** *Routledge First* published in 1990. The Function of Kinship in Medieval Nordic Legislation *BRILL* In the Nordic medieval laws a new definition of kinship – a canonical one – was introduced, based on the Church's incest prohibitions and the requirement to love your kin. It influences the rules for property transfer, inheritance, wergeld and marriage. **John Cassian The Conferences** *The Newman Press* "John Cassian: The Conferences is the first complete English translation of the twenty-four dialogues between Cassian and the desert fathers of Egypt. A native of Dacia, Cassian (c. 360-430) joined a monastery in Bethlehem when he was in his early adult years. From Palestine, Cassian and Germanus, a companion, traveled several times to Egypt where they learned about the monastic tradition from the great desert masters or abbas. Cassian's writings here record twenty-four dialogues with fifteen abbas." "The Conferences have long been a key work in monastic circles and among scholars of spirituality. Ramsey's helpful introductions and annotations make them accessible to a new and broader readership. Careful attention to references, notes and appendices demonstrate the outstanding research and writing which helped produce this monumental volume."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved **Chaucer and Middle English Studies In Honour of Rossell Hope Robbins** *Routledge* Originally published in 1974. The thirty-six essays of this book were written and assembled in hour of an internationally recognised scholar of medieval literature. Written by a diverse range of contributors, the chapters cover not only various studies of aspects of Chaucer's poetry, but also some other medieval authors and investigations about the period, particularly referencing carols and hymns. **The Seven Deadly Sins An Introduction to the History of a Religious Concept with Special Reference to Medieval English Literature** *Oxford Studies in Normative Ethics Volume 12* *Oxford University Press* *Oxford Studies in Normative Ethics* is an annual forum for new work in normative ethical theory. Leading philosophers present original contributions to our understanding of a wide range of moral issues and positions, from analysis of competing approaches to normative ethics (including moral realism, constructivism, and expressivism) to questions of how we should act and live well. OSNE is an essential resource for scholars and students working in moral philosophy. **Aquinas's Disputed Questions on Evil A Critical Guide** *Routledge Library Editions: Chaucer* *Routledge* Reissuing works originally published between 1964 and 1994, this superb set of books is an array of scholarship on one of the most important authors of the medieval period. Some of these titles are introductory

books on Chaucer and his works but others are specifically focused on his humour, or the sources he drew from, or his importance to the development of English poetry, and between them they address all of his works, not only the *Canterbury Tales*. A good coverage of critical study in the area of medieval poetry that contains interesting fodder for any literature student or academic.

Gyn/Ecology The Metaethics of Radical Feminism *Beacon Press* This revised edition includes a New Intergalactic Introduction by the Author. Mary Daly's New Intergalactic Introduction explores her process as a Crafty Pirate on the Journey of Writing *Gyn/Ecology* and reveals the autobiographical context of this "Thunderbolt of Rage" that she first hurled against the patriarchy in 1979 and no hurls again in the Re-Surging Movement of Radical Feminism in the Be-Dazzling Nineties.

The Devil at Baptism Ritual, Theology, and Drama *Wipf and Stock Publishers* The Christian baptismal ceremony was at first quite simple; by the beginning of the third century it included complex anti-demonic rites. Henry Ansgar Kelly here describes the evolution of the rites of baptism from New Testament times to the present day and explores the impact of demonological theories on Christian liturgy. Kelly begins by identifying the nature and origins of the evil spirits that are referred to in the New Testament, which proved to be major subjects of speculation and theological development by the Church Fathers. He then traces the history both of Christian demonology and of the initiation rituals, clearly illustrating their parallel evolution and their interaction. In his analysis, Kelly examines not only the direct expression of demonological theory in the original ceremonies but also the symbolic reinterpretation of theoretically untenable rituals into allegorical dramas. An astute and ambitious work, 'The Devil at Baptism' covers all the anti-demonic rites of the catechumenate and baptismal services and compares developments in East and West since the emergence of Christianity. It will be essential reading for anyone interested in the development of Christian liturgy in particular and in the history of religion in general.

A Companion to Ancrene Wisse *DS Brewer* *Ancrene Wisse* introduced through a variety of cultural and critical approaches which establish the originality and interest of the treatise.

Discourses of Mourning in Dante, Petrarch, and Proust *Oxford University Press* This book brings together, in a novel and exciting combination, three authors who have written movingly about mourning: two medieval Italian poets, Dante Alighieri and Francesco Petrarca, and one early twentieth-century French novelist, Marcel Proust. Each of these authors, through their respective narratives of bereavement, grapples with the challenge of how to write adequately about the deeply personal and painful experience of grief. In Jennifer Rushworth's analysis, discourses of mourning emerge as caught between the twin, conflicting demands of a comforting, readable, shared generality and a silent, solitary respect for the uniqueness of any and every experience of loss. Rushworth explores a variety of major questions in the book, including: what type of language is appropriate to mourning? What effect does mourning have on language? Why and how has the Orpheus myth been so influential on discourses of mourning across different time periods and languages? Might the form of mourning described in a text and the form of closure achieved by that same text be mutually formative and sustaining? In this way, discussion of the literary representation of mourning extends to embrace topics such as the medieval sin of acedia, the proper name, memory, literary epiphanies,

the image of the book, and the concept of writing as promise. In addition to the three primary authors, Rushworth draws extensively on the writings of Sigmund Freud, Julia Kristeva, Jacques Derrida, and Roland Barthes. These rich and diverse psychoanalytical and French theoretical traditions provide terminological nuance and frameworks for comparison, particularly in relation to the complex term melancholia.

The Penn Commentary on Piers Plowman, Volume 2 C Passus 5-9; B Passus 5-7; A Passus 5-8 *University of Pennsylvania Press* The first full commentary on Piers Plowman since the late nineteenth century, the Penn Commentary places the allegorical dream-vision of Piers Plowman within the literary, historical, social, and intellectual contexts of late medieval England, and within the long history of critical interpretation of the poem, assessing past scholarship while offering original materials and insights throughout. The authors' line-by-line, section by section, and passus by passus commentary on all three versions of the poem and on the stages of its multiple revisions reveals new aspects of the work's meaning while assessing and summarizing a complex and often divisive scholarly tradition. The volumes offer an up-to-date, original, and open-ended guide to a poem whose engagement with its social world is unrivaled in medieval English literature, and whose literary, religious, and intellectual accomplishments are uniquely powerful. The Penn Commentary is designed to be equally useful to readers of the A, B, or C texts of the poem. It is geared to readers eager to have detailed experience of Piers Plowman and other medieval literature, possessing some basic knowledge of Middle English language and literature, and interested in pondering further the particularly difficult relationships to both that this poem possesses. Others, with interest in poetry of all periods, will find the extended and detailed commentary useful precisely because it does not seek to avoid the poem's challenges but seeks instead to provoke thought about its intricacy and poetic achievements. Volume 2, by Ralph Hanna, deliberately addresses the question of the poem's perceived "difficulty," by indicating the legitimate areas of unresolved dilemmas, while offering often original explanations of a variety of textual loci. Perhaps more important, his commentary indicates what has not always appeared clear in past approaches—that the poem only "means" in its totality and within some critical framework, and that its annotation needs always to be guided by a sense of Langland's developing arguments.

C.S. Lewis, Poet The Legacy of His Poetic Impulse *Kent State University Press* C.S. Lewis is best known as the creator of the fanciful world of Narnia and writer of literary criticism and Christian apologetics. This book examines Lewis's early writings, under the pseudonym Clive Hamilton, analyzing the influence of his formative poetic aspirations upon his later prose. By looking at early diaries and letters, and the inclusion of four of Lewis's previously unpublished narrative poems and eleven previously unpublished short poems, this text explains the man through his writing.

Spenser's Faerie Queene A Critical Commentary on Books I and II *Manchester University Press* Sin and Salvation in Reformation England *Routledge* Notions of which behaviours

comprised sin, and what actions might lead to salvation, sat at the heart of Christian belief and practice in early modern England, but both of these vitally important concepts were fundamentally reconfigured by the reformation. Remarkably little work has been undertaken exploring the ways in which these essential ideas were transformed by the religious changes of the sixteenth-century. In the field of reformation studies, revisionist scholarship has underlined the vitality of late-medieval English Christianity and the degree to which people remained committed to the practices of the Catholic Church up to the eve of the reformation, including those dealing with the mortification of sin and the promise of salvation. Such popular commitment to late-medieval lay piety has in turn raised questions about how the reformation itself was able to take root. Whilst post-revisionist scholars have explored a wide range of religious beliefs and practices - such as death, providence, angels, and music - there has been a surprising lack of engagement with the two central religious preoccupations of the vast majority of people. To address this omission, this collection focusses upon the history and theology of sin and salvation in reformation and post-reformation England. Exploring their complex social and cultural constructions, it underlines how sin and salvation were not only great religious constants, but also constantly evolving in order to survive in the rapidly transforming religious landscape of the reformation. Drawing upon a range of disciplinary perspectives - historical, theological, literary, and material/art-historical - to both reveal and explain the complexity of the concepts of sin and salvation, the volume further illuminates a subject central to the nature and success of the Reformation itself. Divided into four sections, Part I explores reformers' attempts to define and re-define the theological concepts of sin and salvation, while Part II looks at some of the ways in which sin and salvation were contested: through confessional conflict, polemic, poetry and martyrology. Part III focuses on the practical attempts of English divines to reform sin with respect to key religious practices, while Part IV explores the significance of sin and salvation in the lived experience of both clergy and laity. Evenly balancing contributions by established academics in the field with cutting-edge contributions from junior researchers, this collection breaks new ground, in what one historian of the period has referred to as the 'social history of theology'. **The Charm of a List From the Sumerians to Computerised Data Processing** *Cambridge Scholars Publishing Lists*, one of the most archaic literary genres, stand behind many of our complex mental or rhetorical structures and they often influence the way we conceptualize the world (even if we are unaware of it). They seem plain but may conceal a complicated inner logic. They are agrammatical but may tell a story. Their basic features - selection, order, and layout - may be enough to give them enormous power: by including they exclude, by ordering they create a hierarchy, by taking on particular physical aspects they place themselves into a specific context. These and other issues are discussed in the present transdisciplinary volume collecting the best revised contributions to a workshop on lists held at the Center for Theoretical Study in Prague in November 2008. Each of the 13 articles by researchers from seven countries provides a case study on the subject of list. The fields covered include late antique, medieval and early modern history, philology, philosophy, cognitive and computer science. The contributors aim both at presenting particular cases - specific lists or list-types - and, at the same

time, at addressing methodological issues: exploring the ways of researching lists in their particular disciplines, formulating relevant research themes and questions, contextualizing the subject. Since theoretical discourse on lists has not been established yet, this volume should be seen as a first step in the process, showing the variety of possible research directions on a transdisciplinary level, and raising interest in the topic, which, although it may seem a bit obscure at first, has indeed a lot to offer.
