IBM Tivoli Directory Server for z/OS IBM Redbooks This IBM® Redbooks® publication examines the IBM Tivoli® Directory Server for z/OS®. IBM Tivoli Directory Server is a powerful Lightweight Directory Access Protocol (LDAP) infrastructure that provides a foundation for deploying comprehensive identity management applications and advanced software architectures. This publication provides an introduction to the IBM Tivoli Directory Server for z/OS that provides a brief summary of its features and a examination of the possible deployment topologies. It discusses planning a deployment of IBM Tivoli Directory Server for z/OS, which includes prerequisites, planning considerations, and data stores, and provides a brief overview of the configuration process. Additional chapters provide a detailed discussion of the IBM Tivoli Directory Server for z/OS architecture that examines the supported back ends, discusses in what scenarios they are best used, and provides usage examples for each back end. The discussion of schemas breaks down the schema and provides guidance on extending it. A broad discussion of authentication, authorization, and security examines the various access protections, bind mechanisms, and transport security available with IBM Tivoli Directory Server for z/OS. This chapter also provides an examination of the new Password Policy feature. Basic and advanced replication topologies are also covered. A discussion on plug-ins provides details on the various types of plug-ins, the plug-in architecture, and creating a plug-in, and provides an example plug-in. Integration of IBM Tivoli Directory Server for z/OS into the IBM Workload Manager environment is also covered. This publication also provides detailed information about the configuration of IBM Tivoli Directory Server for z/OS. It discusses deploying IBM Tivoli Directory Server for z/OS on a single system, with examples of configuring the available back ends. Configuration examples are also provided for deploying the server in a Sysplex, and for both basic and advanced replication topologies. Finally it provides

guidance on monitoring and debugging IBM Tivoli Directory Server for z/OS. **SAP Backup using Tivoli Storage Manager** *IBM Redbooks* In this IBM® Redbooks® publication, we give an overview of different data management topics related to a typical SAP® data center. The intrinsic functionality of SAP is not designed to completely handle all the tasks of a data center by itself, but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task We explain SAP basic concepts and the issues with SAP data management. We introduce Tivoli® Storage Manager and all of its products that are related to SAP data management. We provide some comparison between database backup and recovery tools. Finally, we discuss data archiving using IBM DB2® CommonStore for SAP, and discuss high availability requirements and disaster recovery considerations. The second part of this book discusses a practical implementation of SAP backup and recovery with Tivoli Storage Manager. We implement this setup on two separate SAP systems: one running DB2 and the other running Oracle® database. We also implement LAN-free backup and FlashCopy® scenarios. In the sample implementation section, we show many different tasks, such as backup and restore, database recovery, backup monitoring, and tuning. We also cover some advanced backup/availability considerations, such as split mirror backup and standby databases. This book helps individuals that operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using the IBM Tivoli Storage Management product family. **Explorer's Guide Cape Cod, Martha's Vineyard & Nantucket (12th Edition)** *The Countryman Press* Experience the very best of New England's premier vacation destination The most detailed and trusted guide to Cape Cod and its surrounding vacation sites has been revamped for its 12th edition. Explorer's Guide Cape Cod, Martha's Vineyard & Nantucket offers helpful and organized information on all the natural beauty and entertaining attractions the Cape and its islands have to offer—no matter your taste or budget. Read hundreds of dining reviews ranging from America's best clam shacks to elegant four-star bistros. Plan an unforgettable whale-watching excursion, satisfy your nostalgia at an old drive-in theater, or simply find the perfect beachside spot to enjoy that local Cabernet. Each section features must-see sites and curated day-trip itineraries to surpass the hopes of any Cape journey. Whether you're interested in a serene retreat, an outdoor adventure, or local culture, the Explorer's Guide series is unparalleled in its tradition of giving travelers the tools and information they need to discover every corner of their next destination. **Tivoli Integration Scenarios** *IBM Redbooks* This IBM® Redbooks® publication provides a broad view of how Tivoli® system management products work together in several common scenarios. You must achieve seamless integration for operations personnel to work with the solution. This integration is necessary to ensure that the product can be used easily by the users. Product integration contains multiple dimensions, such as security, navigation, data and task integrations. Within the context of the scenarios in this book, you see examples of these integrations. The scenarios implemented in this book are largely based on the input from the integration team, and several clients using IBM products. We based these scenarios on common real-life examples that IT operations often have to deal with. Of course, these scenarios are only a small subset of the possible integration scenarios that can be accomplished by the Tivoli

products, but they were chosen to be representative of the integration possibilities using the Tivoli products. We discuss these implementations and benefits that are realized by these integrations, and also provide sample scenarios of how these integrations work. This book is a reference guide for IT architects and IT specialists working on integrating Tivoli products in real-life environments. **Consumer Reports January-December 2003** *Saint Martin's Griffin* **The Routledge Guide to Music Technology** *Routledge* First published in 2006. So begins The Confessions of Max Tivoli, a heartbreaking love story with a narrator like no other. At his birth, Max's father declares him a "nisse," a creature of Danish myth, as his baby son has the external physical appearance of an old, dying creature. Max grows older like any child, but his physical age appears to go backward--on the outside a very old man, but inside still a fearful child. The story is told in three acts. First, young Max falls in love with a neighborhood girl, Alice, who ages as normally as any of us. Max, of course, does not; as a young man, he has an older man's body. But his curse is also his blessing: as he gets older, his body grows younger, so each successive time he finds his Alice, she does not recognize him. She takes him for a stranger, and Max is given another chance at love. Set against the historical backdrop of San Francisco at the turn of the twentieth century, Max's life and confessions question the very nature of time, of appearance and reality, and of love itself. A beautiful and daring feat of the imagination, Andrew Sean Greer's *The Confessions of Max Tivoli* reveals the world through the eyes of a "monster," a being who confounds the very certainties by which we live and in doing so embodies in extremis what it means to be human. **iPod and iTunes Garage** *Prentice Hall Ptr* A guide to getting the most out of iTunes and an iPod covers such topics as working with playlists, the iTunes Music Library, burning CDs and DVDs, iPod settings, file sharing, iPod software, and iPod accessories. **Remodelista: The A-Z Guide to Remodeling Your Home (A Remodelista Short)** *Artisan Books* *Remodelista: The A-Z Guide to Remodeling Your Home* is a quick and useful guide to remodeling basics, excerpted from *Remodelista*. *Remodelista.com* is the go-to, undisputed authority for home design enthusiasts, remodelers, architects, and designers. IBM Power Systems Performance Guide: Implementing and Optimizing IBM Redbooks This IBM® Redbooks® publication addresses performance tuning topics to help leverage the virtualization strengths of the POWER® platform to solve clients' system resource utilization challenges, and maximize system throughput and capacity. We examine the performance monitoring tools, utilities, documentation, and other resources available to help technical teams provide optimized business solutions and support for applications running on IBM POWER systems' virtualized environments. The book offers application performance examples deployed on IBM Power Systems™ utilizing performance monitoring tools to leverage the comprehensive set of POWER virtualization features: Logical Partitions (LPARs), micro-partitioning, active memory sharing, workload partitions, and more. We provide a well-defined and documented performance tuning model in a POWER system virtualized environment to help you plan a foundation for scaling, capacity, and optimization. This book targets technical professionals (technical consultants, technical support staff, IT Architects, and IT Specialists) responsible for providing solutions and support on IBM POWER systems, including performance tuning.

Subsystem and Transaction Monitoring and Tuning with DB2 11 for z/OS IBM Redbooks This IBM® Redbooks® publication discusses in detail the facilities of DB2® for z/OS®, which allow complete monitoring of a DB2 environment. It focuses on the use of the DB2 instrumentation facility component (IFC) to provide monitoring of DB2 data and events and includes suggestions for related tuning. We discuss the collection of statistics for the verification of performance of the various components of the DB2 system and accounting for tracking the behavior of the applications. We have intentionally omitted considerations for query optimization; they are worth a separate document. Use this book to activate the right traces to help you monitor the performance of your DB2 system and to tune the various aspects of subsystem and application performance. **Italy Rough Guides** From Mantua's Palazzo Ducale to the precipitous coves of the Tyrrhenian coast, this book guides the independent-minded traveler through one of the most adored countries in the world. of color photos. 82 maps. **Time Out London Shopping Guide** *Time Out* Featuring more than 3,000 shops and services from fashion to home furnishings, this guide is both a practical resource and a fun read. Deployment Guide Series IBM Tivoli Compliance Insight Manager In order to comply with government and industry regulations, such as Sarbanes-Oxley, Gramm-Leach-Bliley, and COBIT, enterprises have to constantly detect, validate, and report unauthorized change and out-of-compliance actions on their IT infrastructure. The Tivoli Compliance Insight Manager solution allows organizations to improve the security of their information systems by capturing comprehensive log data, correlating this data through sophisticated log interpretation and normalization, and communicating results through a dashboard and a full set of audit and compliance reporting. We discuss the business context of security audit and compliance software for organizations, and we show a typical deployment within a business scenario. This IBM Redbooks publication is a valuable resource for security officers, administrators, and architects who wish to understand and deploy a centralized security audit and compliance solution.

IBM Power 520 Technical Overview *IBM Redbooks* This IBM Redpaper publication is a comprehensive guide covering the IBM Power 520 server, machine type model 8203-E4A. The goal of this paper is to introduce this innovative server that includes IBM System i and IBM System p and new hardware technologies. The major hardware offerings include: - The POWER6 processor, available at frequencies of 4.2 GHz and 4.7 GHz. - Specialized POWER6 DDR2 memory that provides greater bandwidth, capacity, and reliability. - The 1 Gb or 10 Gb Integrated Virtual Ethernet adapter that brings native hardware virtualization to this server. - EnergyScale technology that provides features such as power trending, power-saving, capping of power, and thermal measurement. - PowerVM virtualization technology. - Mainframe continuous availability brought to the entry server environment. This Redpaper expands the current set of IBM Power System documentation by providing a desktop reference that offers a detailed technical description of the Power 520 system. This Redpaper does not replace the latest marketing materials and tools. It is intended as an additional source of information that, together with existing sources, can be used to enhance your knowledge of IBM server solutions.
