Resource Efficiency and Climate Change

Material Efficiency Strategies for a Low-carbon Future

UN "The International Resource Panel (IRP) was established to provide independent, coherent and authoritative scientific assessments on the use of natural resources and their environmental impacts over the full life cycle. The Panel aims to contribute to a better understanding of how to decouple economic growth from environmental degradation while enhancing well-being. The Secretariat is hosted by the United Nations Environment Programme. IRP assessments demonstrate the opportunities for governments, businesses

and wider society to work together to create and implement policies that ultimately lead to sustainable resource management, including through better planning, technological innovation and strategic incentives and investments. Materials are vital to modern society, but their production is an important source of greenhouse gases. Emissions from material production are now comparable to those from agriculture, forestry, and land use change combined, yet they have received much less attention from the climate policy community. The IPR authors propose looking beyond energy efficiency to reduce global carbon footprint. This report was developed by the IRP in response to a request from the Group of 7. It conducts a rigorous assessment of the contribution of material efficiency to GHG abatement strategies. More concretely, it assesses the potential reduction of GHG emissions from material efficiency strategies applied in residential buildings and light duty vehicles, and reviews policies that address these strategies. The IRP modelling results show that increasing material efficiency can help enhance efforts in moving towards the 1.5° C target set by the Paris Agreement." -- Page 4 of cover

Designing Web Navigation

Optimizing the User Experience

"O'Reilly Media, Inc." Thoroughly rewritten for today's web environment, this bestselling book offers a fresh look at a fundamental topic of web site development: navigation design. Amid all the changes to the Web in the past decade, and all the hype about Web 2.0 and various "rich" interactive technologies, the basic problems of creating a good web navigation system remain. Designing Web Navigation demonstrates that good navigation is not about technology-it's about the ways people find information, and how you guide them. Ideal for beginning to intermediate web designers, managers, other non-designers, and web development pros looking for another perspective, Designing Web Navigation offers basic design principles, development techniques and practical advice, with real-world examples and essential concepts seamlessly folded in. How does your web site serve your business objectives? How does it meet a user's needs? You'll learn that navigation design touches most other aspects of web site development. Happy, Happy, Happy

My Life and Legacy as the Duck Commander

Simon and Schuster This no-holds-barred autobiography chronicles the remarkable life of Phil Robertson, the original Duck Commander and Duck Dynasty® star, from early childhood through the founding of a family business. LIVING THE DREAM Duck calls—though the source of his livelihood—are not what makes Phil Robertson the man he is today. When asked what matters in his life, he's quick to say, "Faith, family, ducks—in that order." It isn't often that a person can live a dream, but Phil Robertson, aka The Duck Commander, has proven that it is possible with vision, hard work, helping hands, and an unshakable faith in the Almighty. Phil's is the remarkable story of one man who followed the call he received from God and soon after invented a duck call that would begin an incredible journey to the life he had always dreamed of for himself and his family. In the love of his country, his family, and his maker, Phil has finally found the ingredients to the "good life" he always wanted. If you ever wind up sitting face-to-face with Phil, you'll see that his enthusiasm and passion for duck hunting and the Lord is no act—it is truly who he is. If you've watched the exceedingly popular A&E® program Duck Dynasty®, you already know the famed Phil Robertson. As patriarch of the Robertson clan and creator of Duck Commander duck calls, he fearlessly leads his family in a responsible work ethic and an active faith. But what you don't know is his life before the show. In the pages of this book, you'll learn of Phil's colorful past and his wild road to the "happy, happy, happy" life he leads today. Before the "happy," Phil's passion for the outdoors and wild living led him down some shady paths. As a young husband and father, he became the proprietor of a rough bar and lived a life, as he says, of "romping, stomping, and ripping" for a number of years. He even left his wife and young boys for a short period of time. Through it all, Phil Robertson has lived his life as a "called" man. Called to live off the land, called to leave a starring role in Louisiana Tech football (playing ahead of Terry Bradshaw) for duck hunting, called to wild living, called to create a new kind of duck call—and finally, called to follow God and lead a life of faith. In this eye-opening and rousing book, you'll find stories that will shock you, as well as those that will inspire you. You'll get to know the man behind the legend, and you'll come away better for it.
