Violent Extremism

A Primer for Mental Health Practitioners

[Routledge](#) **This edited book presents international perspectives on the role of mental health problems in understanding and managing the risk of violent extremism. The chapters included in this book address two themes. First, they describe the research findings on the nature and prevalence of the range of mental health problems (psychosis, personality disorder, post-traumatic stress disorder, anxiety and depression, autism spectrum disorders) in young people and adults who have in the past, committed acts of violence motivated at least in part by extremist ideologies, or who have attempted or threatened such acts, or who for other reasons are thought to be at risk of doing so. Second, the chapters examine what is known about the relationship - or the functional link - between mental health problems and violent extremism. The focus of this book is on clinical practice and understanding the nature of the challenge faced by practitioners and their response to it. It will therefore be of interest to mental health practitioners, service managers and commissioners, and policy makers with a remit to understand and mitigate risk of radicalisation and violent extremism. The chapters in this book were originally published in The Journal of Forensic Psychiatry & Psychology.**

Prevention and Rehabilitation of Hamstring Injuries

Springer Nature This innovative book presents the latest insights into hamstring strain injuries (HSI), one of the most common problems in elite and recreational sport, with a unique focus on prevention and rehabilitation. The research within this area has evolved rapidly over the past 10 years and this text offers a comprehensive overview of the recent and most relevant advances. It fills a gap in the literature, since other books focus on muscle injuries in general and their surgical treatment. Structured around the current evidence in the field, it includes sections on functional anatomy and biomechanics; basic muscle physiology in relation to injury and repair; assessment of risk factors; and factors associated with hamstring strains. It also discusses considerations in relation to acute and chronic injuries and hamstring injury prevention, including pre-season and in-season interventions, as well as management strategies and rehabilitation protocols. The final chapter is devoted to additional interventions when conservative rehabilitation and injury prevention fail. Written by renowned experts in the field, this book will be of great interest to sports physiotherapists, sports physicians, physical trainers and coaches.

Rabi'a From Narrative to Myth

The Many Faces of Islam's Most Famous Woman Saint, Rabi'a al-'Adawiyya

Simon and Schuster Rabi'a al-'Adawiyya is a figure shrouded in myth. Certainly a woman by this name was born in Basra, Iraq, in the eighth century, but her life remains recorded only in legends, stories, poems and hagiographies. The various depictions of her - as a deeply spiritual ascetic, an existentialist rebel and a romantic lover - seem impossible to reconcile, and yet Rabi'a has transcended these narratives to become a global symbol of both Sufi and modern secular culture. In this groundbreaking study, Rkia Elaroui Cornell traces the development of these diverse narratives and provides a history of the iconic Rabi'a's construction as a Sufi saint. Combining medieval and modern sources, including evidence never before examined, in novel ways, *Rabi'a From Narrative to Myth* is the most significant work to emerge on this quintessential figure in Islam for more than seventy years.

The Sunni Tragedy in the Middle East

Northern Lebanon from al-Qaeda to ISIS

Princeton University Press Northern Lebanon is a land in turmoil. Long under the sway of the Assad regime in Syria, it is now a magnet for Sunni Muslim jihadists inspired by anti-Western and anti-Shi'a worldviews. **The Sunni Tragedy in the Middle East** describes in harrowing detail the struggle led by an active minority of jihadist militants, some claiming allegiance to ISIS, to seize control of Islam and impose its rule over the region's Sunni Arab population. Bernard Rougier introduces us to men with links to the mujahidin in Afghanistan, the Sunni resistance in Iraq, al-Qaeda, and ISIS. He describes how they aspire to replace North Lebanon's Sunni elites, who have been attacked and discredited by neighboring powers and jihadists alike, and explains how they have successfully positioned themselves as the local Sunni population's most credible defender against powerful external enemies—such as Iran and the Shi'a militia group Hezbollah. He sheds new light on the methods and actions of the jihadists, their internal debates, and their evolving political agenda over the past decade. This riveting book is based on more than a decade of research, more than one hundred in-depth interviews with players at all levels, and Rougier's extraordinary access to original source material. Written by one of the world's leading experts on jihadism, **The Sunni Tragedy in the Middle East** provides timely insight into the social, political, and religious life of this dangerous and strategically critical region of the Middle East.

Why Syria Goes to War

Thirty Years of Confrontation

Cornell University Press **Rejecting conventional explanations for Syrian foreign policy, which emphasize the personalities and attitudes of leaders, cultural factors peculiar to Arab societies, or the machinations of the great powers, Fred H. Lawson describes key shifts in Damascus's response to regional adversaries in terms of changes in the intensity of political struggles at home. Periodic eruptions of domestic conflict have inspired Syria's ruling coalition to adopt a wide range of programs designed to buy off domestic rivals and perpetuate the predominance of individual coalition members. These programs have undermined the unity of the Ba'thi regime, increasing the chances that opponents will overturn the established order. Challenges to the Ba'thi regime become most threatening whenever crises of accumulation shake the domestic political economy, Lawson contends. Opposition forces gain strength when the state cannot sustain new investment or when competition increases between public and private enterprises. Political and economic trends inside Syria have determined why Damascus has since 1963 alternately escalated tensions with regional rivals and adopted more accommodating postures. Lawson traces this dynamic through five major episodes: the 1967 war with Israel; limited intervention in Jordan in 1970; the widening conflict in Lebanon in 1976; the defusing of conflict with Iraq in 1982; and the rapprochement with Turkey over Kurdish separatism in 1994. These patterns, Lawson suggests, may be characteristic of nations changing from one domestic economic system to a radically different one, as Syria has in the transition from state socialism to a privatized political economy.**

Mental Health and Palestinian Citizens in Israel

Indiana University Press Social work studies examining the mental health issues faced by Arab-Palestinian service users, their families, and their communities in Israel. Minorities face particular social strains, and these are often manifested in their overall mental health. In Israel, just under a quarter of the citizens are Arab Palestinians, yet very little has been published exploring the spectrum of mental health issues prevalent in this population. The work collected here draws on the first-hand experience of experts working with Israeli Palestinians to highlight the problems faced by service users, their families, and their communities. Palestinians in Israel face unique social, gender, and family-related conditions that also need reliable research and assessment. Mental Health and Palestinian Citizens in Israel offers research and observation on three central topics: socio-cultural determinants of mental health, mental health needs, and mental health service utilization. From suicidal behaviors and addiction to generational trauma and the particular concerns of children and the elderly, this broad and careful collection of research opens new dialogues on treatment, prevention, and methods for providing the best possible care to those in need.

It also deals with some of the more controversial topics such as e-cigarettes and web applications. Readers will gain an understanding of how to implement smoking cessation into their everyday practice, but will also expand their knowledge about the policy and systems changes needed for population-wide smoking cessation.

Perfumes

The A-Z Guide

Profile Books 'I've long wished perfumery to be taken seriously as an art, and for scent critics to be as fierce as opera critics, and for the wearers of certain "fragrances" to be hissed in public, while others are cheered. This year has brought Perfumes: The Guide by Luca Turin and Tania Sanchez, which I breathed in, rather than read, in one delighted gulp.' Hilary Mantel, Guardian Perfumes: The Guide is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed. Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume-making. Perfume writing has certainly never been this honest, compelling or downright entertaining.

Passion killers: The art of passion killing in the age of stress and anxiety

Vernon Press **There is growing pressure and stress placed on organisations to fight for customers and service/product placement in an increasingly competitive global marketplace. It has, therefore, never been more important to get the best out of the workforce. To achieve this, the role of the leader can be a fundamental factor in organisational success or failure. Leaders need to have the requisite skills to reflect the demands placed upon them in the 21st century. There are the “accidental managers” who just drop into the role of leadership and others who may develop skills and knowledge in readiness for a leadership role. There are also those who may have the innate ability to lead. Within the mix are those who are characterised by traits associated with the “dark triad” or who may use “pathocratic influence” on others to conform, reinforcing values (or lack of values) associated with toxic leadership. They create damage and harm. They become “passion killers”. The result can lead to a “pathocracy”. This book discusses the role emotional intelligence plays in helping people deal with stressful and challenging experiences, suggesting different ways to cope. The author reflects on the values that are integral to the success or failure of an organisation. “Passion” is identified as an added value that can differentiate one organisation from another. If passion is harmed, it can affect motivation, creativity, output, performance, and productivity. Therefore, this book provides the reader with examples of “passion killing” while making suggestions as to factors that can be adopted to engage and encourage passion. Conclusions are drawn and recommendations made to support those faced with “passion killers”. This book is aimed at those of all ages and educational backgrounds interested in developing their leadership knowledge and skills. It is also aimed at those interested in learning more about differences in personality, emotional intelligence, stress, coping, values, and the importance of understanding the impact of “passion killers”.**
