INSTITUTIONAL ECONOMICS AND NATIONAL COMPETITIVENESS

Routledge **This book offers a strong contribution to the growing field of institutional economics, going beyond the question of why institutions matter and examines the ways in which different types of institutions are conducive to the enhancement of competitiveness and economic development. Adopting a variety of approaches, ranging from New Institutional Economics, Public Choice, Constitutional Political Economy and Austrian Economics, to more traditional economic approaches, contributors examine the important issues of interest to development economics. This book asks whether democracy is a pre-condition for economic development, what the proper role of government is in the age of globalization and whether successful government led policies were the cause of South Korea's economic development. As well as these key questions, the book covers the issues of whether the government should rely on the market process to encourage economic development or must they interfere, and by what criteria one can judge a proposal for policies for economic prosperity. The book tries to make a contribution by introducing a variety of**

perspective, some argue in favour of industrial policies while others argue for a lesser role for the government and a greater entrepreneurial freedom. Some question the wisdom of promoting democracy as a necessary condition for economic development while others argue that political liberalization is the basis of lasting competitive edge of an economy. The book should be of great interest to students and researchers in need of a multi-perspective collection covering several approaches to the issues of institutional economics and national competition.

DEEP HISTORIES

GENDER AND COLONIALISM IN SOUTHERN AFRICA

BRILL Deep hiStories represents the first substantial publication on gender and colonialism in Southern Africa in recent years, and suggests methodological ways forward for a post-apartheid and postcolonial generation of scholars. The volume's theorizing, which is based on Southern African regional material, is certain to impact on international debates on gender - debates which have shifted from earlier feminisms towards theorizations which include sexual difference, subjectivities, colonial (and postcolonial) discourses and the politics of representation. Deep hiStories goes beyond the dichotomies which have largely characterized the discussion of women and gender in Africa, and explores alternative models of interpretation such as 'genealogies of voice'. These 'genealogies' transcend the conventional binaries of visibility and invisibility, speaking and silence. Works covering South Africa from the eighteenth to the twentieth century and Zimbabwe, Namibia and Cameroon in the twentieth include: • Colonial readings of Foucault • Ideologies of domesticity • Torture and testimony of slave women • Women as missionary targets • Gender and the public sphere • Race, science and spectacle • Male nursing on mines • Infanticide, insanity and social control • Fertility and the postcolonial state • Literary reconstructions of the past • Gender-blending and code-switching • De/colonizing the queer The collection includes diverse research on the body in Southern Africa for the first time. It brings new subtleties to the ongoing debates on culture, civility and sexuality, dealing centrally with constructions of race and whiteness in history and literature. It is an important resource for teachers and students of gender and colonial

studies.

AMERICAN LEARNED MEN AND WOMEN WITH CZECHOSLOVAK ROOTS

INTELLECTUALS - SCHOLARS AND SCIENTISTS WHO MADE A DIFFERENCE

AuthorHouse Apart from a few articles, no comprehensive study has been written about the learned men and women in America with Czechoslovak roots. That's what this compendium is all about, with the focus on immigration from the period of mass migration and beyond, irrespective whether they were born in their European ancestral homes or whether they have descended from them. Czech and Slovak immigrants, including Bohemian Jews, have brought to the New World their talents, their ingenuity, their technical skills, their scientific knowhow, and their humanistic and spiritual upbringing, reflecting upon the richness of their culture and traditions, developed throughout centuries in their ancestral home. This accounts for the remarkable success and achievements of these settlers in their new home, transcending through their descendants, as this monograph demonstrates. The monograph has been organized into sections by subject areas, i.e., Scholars, Social Scientists, Biological Scientists, and Physical Scientists. Each individual entry is usually accompanied with literature, and additional biographical sources for readers who wish to pursue a deeper study. The selection of individuals has been strictly based on geographical ground, without regards to their native language or ethical background. This was because under the Habsburg rule the official language was German and any nationalistic aspirations were not tolerated. Consequently, it would be virtually impossible to determine their innate ethnic roots or how the respective individuals felt. Doing it in any other way would be a mere guessing, and, thus, less objective.

THE POLITICS OF THE SECOND ELECTORATE

WOMEN AND PUBLIC PARTICIPATION: BRITAIN, USA, CANADA, AUSTRALIA, FRANCE, SPAIN, WEST GERMANY, ITALY, SWEDEN, FINLAND, EASTERN EUROPE, USSR, JAPAN

Routledge Prior to publication there had been little study of the political role of women. Gender had been seen only as a background variable in social surveys of political behaviour, and women had rarely been extensively or separately considered. Now, in essays specially written for this volume, first published in 1981, the authors map out the political behaviour of women in twenty 'industrially developed' countries, bringing together and analysing contemporary

material on a variety of topics, such as voting, standing for public office, entering the political elite, and engaging in political activity outside the formal structures of government. In each chapter the history of women's political activity is outlined, from the first movements for female suffrage and emancipation to the new political involvement occasioned by the women's movements of the 1970s. The impact of differing political systems on the experience of women is considered, and some striking similarities and differences are pointed out. It has been generally agreed that women's participation in politics has been less than that of men, although reasons postulated for this have varied widely. The essays in this book offer further suggestions in this area, while charting a steady increase in activity by women in all political spheres as feminism politicises issues previously restricted to private or male-dominated spheres and women become increasingly concerned to participate in the political process. The authors indicate current trends and explode prevailing myths and the 'second electorate', and they suggest future possibilities, both for Political Woman and the Political Science which must take account of feminist political activity. Students of social and political science, readers seeking comprehensive, cross-national coverage of party and election data, and all interested women will find the book to be a mine of information and a rare and readable picture of half the world's electorate.

WOMEN OF THE FIRST NATIONS

POWER, WISDOM, AND STRENGTH

Univ. of Manitoba Press "From diversity comes strength and wisdom": this was the guiding principle for selecting the articles in this collection. Because there is no single voice, identity, history, or cultural experience that represents the women of the First Nations, a realistic picture will have many facets. Accordingly, the authors in Women of the First Nations include Native and non-Native scholars, feminists, and activists from across Canada. Their work examines various aspects of Aboriginal women's lives from a variety of theoretical and personal perspectives. They discuss

standard media representations, as well as historical and current realities. They bring new perspectives to discussions on Aboriginal art, literature, historical, and cultural contributions, and they offer diverse viewpoints on present economic, environmental, and political issues. This collection counters the marginalization and silencing of First Nations women's voices and reflects the power, strength, and wisdom inherent in their lives.

CLIO

THE OXFORD HANDBOOK OF JEWISH ETHICS AND MORALITY

Oxford University Press For thousands of years the Jewish tradition has been a source of moral guidance, for Jews and non-Jews alike. As the essays in this volume show, the theologians and practitioners of Judaism have a long history of wrestling with moral questions, responding to them in an open, argumentative mode that reveals the strengths and weaknesses of all sides of a question. The Jewish tradition also offers guidance for moral conduct by individuals, communities, and countries and shows how to motivate people to do the good and right thing. The Oxford Handbook of Jewish Ethics and Morality is a collection of original essays addressing these topics--historical and contemporary, as well as philosophical and practical--by leading scholars from around the world. The first section of the volume describes the history of the Jewish tradition's moral thought, from the Bible to contemporary Jewish approaches. The second part includes chapters on specific fields in ethics, including the ethics of medicine, business, sex, speech, politics, war, and the environment.

CONCEPTS FOR COMMUNICATION AND DEVELOPMENT IN BILINGUAL-BICULTURAL COMMUNITIES

Walter de Gruyter

REDUCING PREJUDICE AND DISCRIMINATION

Psychology Press Finding ways to reduce prejudice and discrimination is the central issue in attacking racism in our society. Yet this book is almost unique among scientific volumes in its focus on that goal. This important book combines critical analysis of theories about how to reduce prejudice and discrimination with cutting-edge empirical research conducted in real-world settings, as well as in controlled laboratory situations. This book's outstanding contributors focus on a common set of questions about ways to reduce intergroup conflict, prejudice, and stereotyping. They summarize their own research, as well as others, interpret the conclusions, and suggest implications concerning the practical methods that have been, or could be, used in programs aimed at reducing intergroup conflict. The chapters present solidly based critical analyses and research findings in clear, reader-friendly prose. This book evolved from the Sixteenth Annual Claremont Symposium on Applied Social Psychology. Each Symposium in the series concentrates on a single area in which social psychological knowledge is being applied to the resolution of a current social problem. Ideal for teachers, social workers, administrators, managers, and other social practitioners who are concerned about prejudice and discrimination, this book will also serve as a valuable foundation of knowledge in courses that examine this topic.

EXPLORING MORE SIGNATURE PEDAGOGIES

APPROACHES TO TEACHING DISCIPLINARY HABITS OF MIND

Stylus Publishing, LLC. What is distinctive about the ways specific disciplines are traditionally taught, and what kinds of learning do they promote? Do they inspire the habits of the discipline itself, or do they inadvertently contradict or ignore those disciplines? By analyzing assumptions about often unexamined teaching practices, their history, and relevance in contemporary learning contexts, this book offers teachers a fresh way to both think about their impact on students and explore more effective ways to engage students in authentic habits and practices. This companion volume to *Exploring Signature Pedagogies* covers disciplines not addressed in the earlier volume and further expands the scope of inquiry by interrogating the teaching methods in interdisciplinary fields and a number of professions, critically returning to Lee S. Shulman's origins of the concept of signature pedagogies. This volume also differs from the first by including authors from across the United States, as well as Ireland and Australia. The first section examines the signature pedagogies in the humanities and fine arts fields of philosophy, foreign language instruction, communication, art and design, and arts entrepreneurship. The second section describes signature pedagogies in the social and natural sciences: political science, economics, and chemistry. Section three highlights the interdisciplinary fields of Ignatian pedagogy, women's studies, and disability studies; and the book concludes with four chapters on professional pedagogies - nursing, occupational therapy, social work, and teacher education - that illustrate how these pedagogies change as the social context changes, as their knowledge base expands, or as online delivery of instruction

increases.

JOHN DONNE'S PROFESSIONAL LIVES

DS Brewer No description available.

MARIANNA SIRCA

Fairleigh Dickinson Univ Press Jan Kozma's translation of Marianna Sirca is the near-literal rendering of a novel written by Grazia Deledda (1871-1936), the celebrated Italian author from Sardinia who won the Nobel Prize for Literature in 1926. Almost all of Deledda's stories treat the lives, loves, tragedies, and triumphs of the author's native land - the remote, isolated, and often forbidding island of Sardinia. This new translation includes an introduction that highlights the salient episodes of Grazia Deledda's life and which situates Marianna Sirca both literarily within the author's opera omnia and as part of the general literary trends of the early European twentieth century. Jan Kozma presents the homonymous protagonist, Marianna Sirca, as one of the great literary precursors of the liberated, independent, modern woman - an ironic twist, given the repressive culture in which Marianna lives. The translator also provides numerous explanatory foot-notes that elucidate particular arcane aspects of Sardinian life in the late nineteenth century. Marianna Sirca is a 30-year-old woman of inherited wealth who lives in Nuoro, Sardinia. Because of her strong will and sense of independence, Marianna is the family "black sheep" - refusing to be married off to a distant relative in a social arrangement of convenience. Instead Marianna becomes involved with Simone Sole, a younger man who was a servant in the Sirca household in his youth and who is now an outlaw - wanted for banditry. Against the will of her entire family, the lovers plan to marry, but at Marianna's insistence only after Simone "gets right with the law." The novel traces the story of these two emarginated lovers through various twists and turns, ending with a typical Deleddan flourish that leaves the reader with a real awareness of Sardinian, social mores, values, attitudes, and tradition.

ALTERNATIVE FUELS AND THE ENVIRONMENT

CRC Press **Alternative Fuels and the Environment** evaluates the timely issue of renewable, alternative resources to fossil fuels and nuclear energy, such as solar, anemoelectric, hydroelectric, and geothermal energy. These alternative power sources not only have the advantage of being renewable, but they are also economically attractive and have minimal

adverse environmental impact, such as the waste emission of SO₂, NO_x, or greenhouse gases. This book analyzes the harnessing of the sun's energy by photochemical reactions, artificial photosynthesis, and photovoltaic electric power generation. It further discusses how hydrogen as fuel is produced by solar photoelectrolysis of water and how wind turbines generate electricity, while ocean thermal energy produces electric power and fresh water. Geothermal energy and hydroelectric power are also renewable sources of electricity. Biofuels and biomass are useful as energy sources, and surplus land is usable for woody, herbaceous, high-yield energy crop production. The book also investigates reformulated gasoline with oxygenated fuels, such as ethanol or methanol.

CRITICAL ISSUES IN EARLY LITERACY

RESEARCH AND PEDAGOGY

Routledge This volume adds in important ways to understanding the power and complexity of the forces in the lives of children that impact their literacy learning. The critical issues presented emerge from interpretivist research and thinking practices that are constructivist in nature. The chapters by researchers, teacher researchers, teacher educators, and teachers are antidotes to the present political context in which political agendas are being used to define literacy, literacy teaching and learning, and literacy research in narrow ways. Providing a rich source of information about how young children come to know reading and writing as a tool of communication in a range of social and cultural contexts, this book: *presents current research and thinking in the field; *documents research that is currently being ignored by many who make decisions about children's learning; *values who children are and what they bring with them to school; *provides a useful tool for advocacy and for social action toward improving education in ways that can make a difference in the lives of young children; and *raises thoughtful issues for discussion. *Critical Issues in Early Literacy* is essential reading for early childhood teachers and prospective teachers, for teacher educators, for literacy researchers (including teacher researchers), for special educators, for those working with English-language and foreign-language learners, and for early childhood education administrators, advocates, and policy makers.

PROBLEM POSING

REFLECTIONS AND APPLICATIONS

Psychology Press As a result of the editors' collaborative teaching at Harvard in the late 1960s, they produced a ground-breaking work -- *The Art Of Problem Posing* -- which related problem posing strategies to the already popular activity of problem solving. It took the concept of problem posing and created strategies for engaging in that activity as a central theme in mathematics education. Based in part upon that work and also upon a number of articles by its authors, other members of the mathematics education community began to apply and expand upon their ideas. This collection of thirty readings is a testimony to the power of the ideas that originally appeared. In addition to reproducing relevant materials, the editors of this book of readings have included a considerable amount of interpretive text which places the articles in the context of problem solving. While the preponderance of essays focus upon mathematics and mathematics education, some of them point to the relevance of problem posing to other fields such as biology or psychology. In the interpretive text that accompanies each chapter, they indicate how ideas expressed for one audience may be revisited or transformed in order to ready them for a variety of audiences.
