INTERPRETING THE RENAISSANCE

PRINCES, CITIES, ARCHITECTS

Yale University Press "Tafari studies the theory and practice of Renaissance architecture, offering new and compelling readings of its various social, intellectual, and cultural contexts while providing a broad understanding of uses of representation that shaped the entire era. He synthesizes the history of architectural ideas and projects through discussions of the great centers of architectural innovation in Italy (Florence, Rome, and Venice), key patrons from the middle of the fifteenth century (Pope Nicholas V) to the early sixteenth century (Pope Leo X), and crucial figures such as Leon Battista Alberti, Filippo Brunelleschi, Lorenzo de' Medici, Raphael, Baldassare Castiglione, and Giulio Romano. Interpreting the Renaissance is an essential book for anyone interested in the architecture and culture of fifteenth- and sixteenth-century Italy."--BOOK JACKET.

«PINO» ROSA SALVA. VENEZIA E LA SUA LAGUNA

ITALIAN VENICE

A HISTORY

Yale University Press In this elegant book Richard Bosworth explores Venice—not the glorious Venice of the Venetian Republic, but from the fall of the Republic in 1797 and the Risorgimento up through the present day. Bosworth looks at the glamour and squalor of the belle époque and the dark underbelly of modernization, the two world wars, and the far-reaching oppressions of the fascist regime, through to the “Disneylandification” of Venice and the tourist boom, the worldwide attention of the biennale and film festival, and current threats of subsidence and flooding posed by global warming. He draws out major themes—the increasingly anachronistic but deeply embedded Catholic Church, the two faces of modernization, consumerism versus culture. Bosworth interrogates not just Venice’s history but its meanings, and how the city’s past has been co-opted to suit present and sometimes ulterior aims. Venice, he shows, is a city where its histories as well as its waters ripple on the surface.

Instructors will also find an easy-to-use grade book, an instructor dashboard, and a class roster system that facilitates course management and helps reduce administrative workload.

THE PILLARS OF THE ITALIAN ECONOMY

MANUFACTURING, FOOD & WINE, TOURISM

Springer This book offers a detailed analysis of the key sectors in the Italian economy, with the focus especially on areas in which the economy excels, such as the automatic packaging machinery sector, pharmaceutical production, the food and wine industry, and tourism. The book explains how, contrary to widespread opinion, Italy is one of the world’s most competitive countries in foreign trade, as confirmed by a new index compiled by Fondazione Edison that highlights its strengths and top traded products. The main characteristics of the Italian productive system, which is primarily composed of SMEs, are documented, and a map illustrating the importance of the various industrial districts is proposed, identifying their sectors of specialization, historical roots, and development. The principal steps in Italy’s industrialization over the past 150 years are then outlined, in particular for the manufacturing system - the main driver of Italian exports. In-depth analyses of the mechanical industry and the machinery sector follow. In combining meticulous analysis of statistical data with a historical perspective, this book will appeal to all with an interest in the Italian economy.

MITIGAZIONI E MONITORAGGI PER IL GOVERNO DEL CAMBIAMENTO / MITIGATION AND MONITORING MEASURES TO MANAGE CHANGE

Altralinea Edizioni Il presente volume, in continuità con il precedente Venezia Fragile, pubblicato dagli stessi autori nel 2014, rivolge l’attenzione a tre tematiche, ritenute strategiche dall’Amministrazione Comunale e dalla Soprintendenza per la fruizione e la percezione della Città Antica: residenzialità, occupazione del suolo pubblico e manutenzione degli spazi urbani. L’analisi sviluppata ha portato alla definizione di strategie di monitoraggio e di mitigazione che, agendo attraverso azioni correttive facilmente gestibili in sede locale, potrebbero ristabilire alcuni degli equilibri ormai in bilico. Se si pensa che la fine di questa ricerca è collocabile ai primi di marzo 2020, quando l’emergenza sanitaria da Covid-19 in Italia era appena agli inizi, l’attuazione di alcuni degli scenari proposti acquisterebbe ancora più valenza strategica per l’Amministrazione, rappresentando una grande opportunità per ripensare al modello sociale, economico e di sviluppo anche di una città di rilievo internazionale come Venezia.

PROCESSI DI USURA DEL SISTEMA URBANO E POSSIBILI MITIGAZIONI

Altralinea Edizioni Da più parti si lamenta un significativo aumento di potenziali minacce per la salvaguardia fisica e l'equilibrio sociale della città di Venezia, a scapito della qualità di vita per i residenti e di fruibilità per gli utenti esterni. Quali sono tali minacce, come misurarne l'incidenza sulla città? Quali invece i luoghi comuni da sfatare? Il volume descrive gli esiti di una ricerca (all'interno del Piano di Gestione UNESCO "Venezia e la sua Laguna") sui i fattori di usura 'fisica' e 'percettiva' cui è sottoposto il Centro Storico e la valutazione della loro pericolosità, al fine di determinare criteri e strumenti di mitigazione. La molteplicità dei livelli di analisi ha permesso di costruire un quadro d'insieme ampio, tenendo in adeguata considerazione la forte interconnessione fra agenti di carattere naturale o antropico, i cui effetti risultano moltiplicati dalle reciproche interazioni.

THE ART OF RENAISSANCE VENICE

ARCHITECTURE, SCULPTURE, AND PAINTING, 1460-1590

University of Chicago Press Norbert Huse and Wolfgang Wolters provide the first contemporary single-volume survey of the three arts of Venice -- painting, sculpture, and architecture. They offer an important counterbalance to the traditional orientation toward painting as the city's preeminent art by focusing on architecture as the essential Venetian artistic medium. In the process, they define the distinctly Venetian terms by which the city and culture should be understood. Huse and Wolters begin their study with 1460, when Venice was one of the key powers of Italy, and end their discussion with the death of Tintoretto in 1594, a period of waning international power. Wolfgang Wolters outlines the city's development and present a typological survey of Venetian architecture. A review of sculptors and their works follows. Norbert Huse opens the next section, on painting, by describing the changed situation of painters at the end of the fifteenth century. He explores the different forms and functions of Venetian paintings in three distinct periods. With over three hundred illustrations and an exhaustive bibliography, this volume successfully fills a gap in art historical scholarship. -- From publisher's description.

VENICE

FRAGILE CITY, 1797-1997

Yale University Press Margaret Plant presents a wide-ranging cultural history of the city from the fall of the Republic in 1797, until 1997, showing how it has changed and adapted and how perceptions of it have shaped its reality.

PLAGUE HOSPITALS

PUBLIC HEALTH FOR THE CITY IN EARLY MODERN VENICE

Routledge Developed throughout early modern Europe, lazaretti, or plague hospitals, took on a central role in early modern responses to epidemic disease, in particular the prevention and treatment of plague. The lazaretti served as isolation hospitals, quarantine centres, convalescent homes, cemeteries, and depots for the disinfection or destruction of infected goods. The first permanent example of this institution was established in Venice in 1423 and between the fifteenth and eighteenth centuries tens of thousands of patients passed through the doors. Founded on lagoon islands, the lazaretti tell us about the relationship between the city and its natural environment. The plague hospitals also illustrate the way in which medical structures in Venice intersected with those of piety and poor relief and provided a model for public health which was influential across Europe. This is the first detailed study of how these plague hospitals functioned, where they were situated, who worked there, what it was like to stay there, and how many people survived. Comparisons are made between the Venetian lazaretti and similar institutions in Padua, Verona and other Italian and European cities. Centred on the sixteenth and seventeenth centuries, during which time there were both serious plague outbreaks in Europe and periods of relative calm, the book explores what the lazaretti can tell us about early modern medicine and society and makes a significant contribution to both Venetian history and our understanding of public health in early modern Europe, engaging with ideas of infection and isolation, charity and cure, dirt, disease and death.

"ARCHITECTURE, ART AND IDENTITY IN VENICE AND ITS TERRITORIES, 1450?750 "

ESSAYS IN HONOUR OF DEBORAH HOWARD

Routledge Cities are shaped as much by a repertoire of buildings, works and objects, as by cultural institutions, ideas and interactions between forms and practices entangled in identity formations. This is particularly true when seen through a city as forceful and splendid as Venice. The essays in this volume investigate these connections between art and identity, through discussions of patronage, space and the dissemination of architectural models and knowledge in Venice, its territories and beyond. They celebrate Professor Deborah Howard's leading role in fostering a historically grounded and interdisciplinary approach to the art and architecture of Venice. Based on an examination and re-interpretation of a wide range of archival material and primary sources, the contributing authors approach the notion of identity in its many guises: as self-representation, as strong sub-currents of spatial strategies, as visual and semantic discourses, and as political and imperial aspirations. Employing interdisciplinary modes of interpretation, these studies offer ground-breaking analyses of canonical sites and works of art, diverse groups of patrons, as well as the life and oeuvre of leading architects such as Jacopo Sansovino and Andrea Palladio. In so doing, they link together citizens and nobles, past and present, the real and the symbolic, space and sound, religion and power, the city and its parts, Venice and the Stato da Mar, the Serenissima and the Sublime Port.

THE VENETIAN BRIDE

BLOODLINES AND BLOOD FEUDS IN VENICE AND ITS EMPIRE

Oxford University Press A true story of vendetta and intrigue, triumph and tragedy, exile and repatriation, this book recounts the interwoven microhistories of Count Girolamo Della Torre, a feudal lord with a castle and other properties in the Friuli, and Giulia Bembo, grand-niece of Cardinal Pietro Bembo and daughter of Gian Matteo Bembo, a powerful Venetian senator with a distinguished career in service to the Venetian Republic. Their marriage in the mid-sixteenth century might be regarded as emblematic of the Venetian experience, with the metropole at the center of a fragmented empire: a Terraferma nobleman and the daughter of a Venetian senator, who raised their family in far off Crete in the stato da mar, in Venice itself, and in the Friuli and the Veneto in the stato da terra. The fortunes and misfortunes of the nine surviving Della Torre children and their descendants, tracked through the end of the Republic in 1797, are likewise emblematic of a change in feudal culture from clan solidarity to individualism and intrafamily strife, and ultimately,

redemption. Despite the efforts by both the Della Torre and the Bembo families to preserve the patrimony through a succession of male heirs, the last survivor in the paternal bloodline of each was a daughter. This epic tale highlights the role of women in creating family networks and opens a precious window into a contentious period in which Venetian republican values clash with the deeply rooted feudal traditions of honor and blood feuds of the mainland.

ARCHEOLOGIA E CALCOLATORI, 32.1, 2021

All'Insegna del Giglio Il volume 32.1 è suddiviso in due parti. La prima comprende gli articoli proposti annualmente alla rivista da studiosi italiani e stranieri che illustrano ricerche archeologiche interdisciplinari in cui l'uso delle tecnologie informatiche risulta determinante per l'acquisizione, l'elaborazione e l'interpretazione dei dati. Tecniche di analisi statistica, banche dati, GIS e analisi spaziali, tecniche di rilievo tridimensionale e ricostruzioni virtuali, sistemi multimediali, contribuiscono a documentare le testimonianze del passato e a diffondere i risultati della ricerca scientifica. La seconda parte del volume contiene un inserto speciale curato da Angela Bellia e dedicato a una tematica innovativa, l'archeomusicologia, un campo di ricerca multidisciplinare che adotta i metodi dell'archeologia per lo studio della musica e della vita musicale nel mondo antico. Gli articoli s'incentrano sul ruolo delle tecnologie digitali basate sulla modellazione 3D e sulla simulazione del suono per ampliare le conoscenze sugli strumenti musicali dell'antichità e sul prezioso, ma estremamente labile, patrimonio sonoro. Chiude il volume la sezione dedicata alle Note e recensioni.

STRUCTURAL ANALYSIS OF HISTORICAL CONSTRUCTIONS: ANAMNESIS, DIAGNOSIS, THERAPY, CONTROLS

PROCEEDINGS OF THE 10TH INTERNATIONAL CONFERENCE ON STRUCTURAL ANALYSIS OF HISTORICAL CONSTRUCTIONS (SAHC, LEUVEN, BELGIUM, 13-15 SEPTEMBER 2016)

CRC Press Structural Analysis of Historical Constructions. Anamnesis, diagnosis, therapy, controls contains the papers presented at the 10th International Conference on Structural Analysis of Historical Constructions (SAHC2016, Leuven, Belgium, 13-15 September 2016). The main theme of the book is "Anamnesis, Diagnosis, Therapy, Controls", which emphasizes the importance of all steps of a restoration process in order to obtain a thorough understanding of the structural behaviour of built cultural heritage. The contributions cover every aspect of the structural analysis of historical constructions, such as material characterization, structural modelling, static and dynamic monitoring, non-destructive techniques for on-site investigation, seismic behaviour, rehabilitation, traditional and innovative repair techniques, and case studies. The knowledge, insights and ideas in Structural Analysis of Historical Constructions. Anamnesis, diagnosis, therapy, controls make this book of abstracts and the corresponding, digital full-colour conference proceedings containing the full papers must-have literature for researchers and practitioners involved in the structural analysis of historical constructions.

CHIOSTRI TRA LE ACQUE. I MONASTERI FEMMINILI DELLA LAGUNA NORD DI VENEZIA NEL BASSO MEDIOEVO (PREMIO OTTONE D'ASSIA E RICCARDO FRANCOVICH 2010)

All'Insegna del Giglio Le regioni settentrionali della laguna di Venezia hanno assistito, durante l'età medievale, ad una grande moltiplicazione delle istituzioni cenobitiche femminili, altrettanto conosciuta è la drastica diminuzione a cui questi enti andarono incontro durante la prima età moderna. Lo scopo di questo volume è indagare le ragioni di questo fenomeno, che si ritiene possa essere compreso solo attraverso l'intreccio delle relazioni sociali e delle questioni economiche ed ambientali che interessavano la laguna in quei secoli. Il proposito che anima questa ricerca non è quello di fermarsi davanti alla soglia di questi monasteri, cogliendone il ruolo simbolico e funzionale che i gruppi laici ed ecclesiastici attribuivano loro. Viceversa, si desidera fare un passo all'interno di questi chiostrini, per interpretare le dinamiche interne che strutturarono queste comunità nel corso del tempo. La chiave per aprire queste porte la si è cercata sia negli scritti che nella cultura materiale del passato.

PRIVATE LIVES IN RENAISSANCE VENICE

ART, ARCHITECTURE, AND THE FAMILY

Yale University Press "As the sixteenth century opened, members of the patriciate were increasingly withdrawing from trade, desiring to be seen as "gentlemen in fact" as well as "gentlemen in name." The author considers why this was so and explores such wide-ranging themes as attitudes toward wealth and display, the articulation of family identity, the interplay between the public and the private, and the emergence of characteristically Venetian decorative practices and styles of art and architecture. Brown focuses new light on the visual culture of Venetian women - how they lived within, furnished, and decorated their homes; what spaces were allotted to them; what their roles and domestic tasks were; how they dressed; how they raised their children; and how they entertained. Bringing together both high arts and low, the book examines all aspects of Renaissance material culture."--BOOK JACKET.

GIAMMARIA MOSCA CALLED PADOVANO

A RENAISSANCE SCULPTOR IN ITALY AND POLAND

Penn State Press Author of statues in the major churches of Padua and Venice, Giammaria Mosca was among the leading sculptors in northern Italy during the second and third decades of the sixteenth century. In 1529 Mosca was summoned by the King of Poland to erect his tomb in Cracow. From 1533 until the artist's death in 1574, documents at regular intervals record important commissions to Mosca throughout Poland from the Polish royal family, as well as from prominent members of the nobility and ecclesiastical hierarchy. Many of Mosca's inscribed and documented monuments survive in their original site and state and testify to the sculptor's key role in the diffusion in Eastern Europe of Italian Renaissance ideals. In both native and adoptive homes, thus, there exists a substantial body of extant and documented works by Mosca; indeed, Mosca is virtually unique among émigré Renaissance sculptors for the completeness with which both halves of his career are documented and therefore offers the perfect test case for assessing the effect of emigration from the center to the periphery. Yet no one has ever asked whether Mosca's move to Poland changed his art. For the first time, Anne Markham Schulz not only explores the effect on Mosca's art of new patrons and materials, of different artistic conventions, functions, and traditions, but also sets Mosca's emigration within the context of those cultural exchanges between Italy and Poland that contributed fundamentally to the formation of the Polish Renaissance. This book represents the first comprehensive study of Giammaria Mosca in any language. It includes more than 260 detail photographs of all of Mosca's sculptures; almost every one has been made anew, many from specially constructed scaffolds. In addition, another 109 photographs illustrate comparative works. All documents concerning the artist, most never published before and many quite unknown, are reproduced in their entirety. There is an exhaustive catalogue of all works attributed to Mosca or his shop and a comprehensive bibliography of scholarship in ten languages.

Academica Press **Lic** This is the first research work in English and Italian to attempt an accurate historical and cultural survey of the lagoon islands of Venice other than Murano, Torcello and Burano. The authors have had over thirty five years of experience mapping, describing and, in some cases, preserving the heritage of these numerous islands. The abandonment of the islands has left many in great peril from changing climate, time and the depredations of man. Extraordinarily rich in detail and discussion (included material from medieval, Renaissance, Enlightenment and modern sources, chroniclers and writers that has hitherto not been translated). A discussion of current urban and climatic issues facing the Venetian lagoon also included. ABITARE**STORIA DELLA LETTERATURA VENETA. VOLUME PRIMO. DALLE ORIGINI AL QUATTROCENTO***Lulu.com***SOCIAL CAPITAL AND URBAN NETWORKS OF TRUST**

Routledge This is the first book on social capital and trust informed by a critical geographical perspective. The authors examine the role of social capital in the constitution and reproduction of urban networks of trust in different places and contexts. They explore how social capital and trust are reflected in the capacity of these networks to achieve their goals and to deliver specific forms of urban development in a number of Finnish and Italian cities. Finland and Italy present, in many ways, two almost paradigmatic cases of how social capital and trust can work in extremely different and yet very effective ways in the production of the urban. They are two almost ideal laboratories for experimenting new definitions and new understandings of the concepts in question.

Metropolitan Museum of Art Serves as both visual and textual record of the exhibition of the same name, surveying the art of the Middle Byzantine period from the restoration of the use of icons by the Orthodox Church in 843 to the occupation of Constantinople by the Crusader forces from the West from 1204 to 1261. Conceived as a sequel to the 1976 exhibition "Age of Spirituality," which focused on the first centuries of Byzantium. Preceding the catalogue, 17 essays treat the historical context, religious sphere, and secular courtly realm of the empire, and the interactions between Byzantium and other medieval cultures.
