Parentology

Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

Simon and Schuster **An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.**

Manual of Standardization in the Romance Languages

Walter de Gruyter GmbH & Co KG **Language standardization is an ongoing process based on the notions of linguistic correctness and models. This manual contains thirty-six chapters that deal with the theories of linguistic norms and give a comprehensive up-to-date description and analysis of the standardization processes in the Romance languages. The first section presents the essential approaches to the concept of linguistic norm ranging from antiquity to the present, and includes individual chapters on the notion of linguistic norms and correctness in classical grammar and rhetoric, in the Prague School, in the linguistic theory of Eugenio Coseriu, in sociolinguistics as well as in pragmatics, cognitive and discourse linguistics. The second section focuses on the application of these notions with respect to the Romance languages. It examines in detail the normative grammar and the normative dictionary as the reference tools for language codification and modernization of those languages that have a long and well-established written tradition, i.e. Romanian,**

Italian, French, Catalan, Spanish, and Portuguese. Furthermore, the volume offers a discussion of the key issues regarding the standardization of the 'minor' Romance languages as well as Creoles.

Undersea Atrophia

Geoffrey Morrison **A great silence has settled upon a drowned world. In the final battle of their final war, the massive citysubs Universalis and Population reduced each other to ruins. One lays wrecked on the seafloor. The other, beached and lifeless, litters the island of pristine polar ice it tried to destroy. Pockets of survivors huddle together. On the frigid surface, Ralla Gattley and Thom Vargas cling to life and each other. Below, the soldier Geran Lo fights relentlessly to free trapped and drowning civilians. As they struggle against a world determined to kill them, a new and even more dangerous menace approaches. Undersea Atrophia is the second book in the Undersea Saga.**

The Conservative Case for Class Actions

[University of Chicago Press](#) Since the 1960s, the class action lawsuit has been a powerful tool for holding businesses accountable. Yet years of attacks by corporate America and unfavorable rulings by the Supreme Court have left its future uncertain. In this book, Brian T. Fitzpatrick makes the case for the importance of class action litigation from a surprising political perspective: an unabashedly conservative point of view. Conservatives have opposed class actions in recent years, but Fitzpatrick argues that they should see such litigation not as a danger to the economy, but as a form of private enforcement of the law. He starts from the premise that all of us, conservatives and libertarians included,

believe that markets need at least some rules to thrive, from laws that enforce contracts to laws that prevent companies from committing fraud. He also reminds us that conservatives consider the private sector to be superior to the government in most areas. And the relatively little-discussed intersection of those two beliefs is where the benefits of class action lawsuits become clear: when corporations commit misdeeds, class action lawsuits enlist the private sector to intervene, resulting in a smaller role for the government, lower taxes, and, ultimately, more effective solutions. Offering a novel argument that will surprise partisans on all sides, *The Conservative Case for Class Actions* is sure to breathe new life into this long-running debate.

Fundamentals of Global Strategy

A Business Model Approach

Business Expert Press The globalization of the competitive landscape has forced companies to fundamentally rethink their strategies. Whereas once only a few industries such as oil could be labeled truly global, today many—from pharmaceuticals to aircraft to computers—have become global in scale and scope. As a consequence, creating a global competitive advantage has become a key strategic issue for many companies. Crafting a global strategy requires making decisions about which strategy elements can and should be globalized and to what extent.

Standard 62.1 User's Manual

Based on ANSI/ASHRAE Standard 62.1-2016, Ventilation for Acceptable Indoor Air Quality

THE DEFINITIVE COMPANION TO STANDARD 62.1 This companion guide provides detailed information on the requirements of ANSI/ASHRAE Standard 62.1-2016 and includes tables, illustrations, and examples to aid users in designing, installing, and operating systems for ventilation in buildings. *Standard 62.1 User's Manual* does not reproduce the requirements of the standard but rather paraphrases and elaborates upon them. Intended to be used in conjunction with the standard, this manual provides:

- Information on the intent and application of Standard 62.1
- Sample calculations and examples
- Best practices for applying the principles of good indoor air quality (IAQ) and effective ventilation when designing buildings and building systems
- Useful reference material
- Guidance for building operation and maintenance personnel
- Instructions for the user in the application of tools used for compliance with ANSI/ASHRAE Standard 62.1-2016

Also included is an exclusive link to the newly revised web-based spreadsheets that aid in ventilation rate procedure calculations. This manual is intended for architects, engineers, manufacturers, plan examiners, field inspectors, general and specialty contractors, and operation and maintenance personnel. *Standard 62.1 User's Manual* is a crucial supplement for professionals concerned with ventilation and indoor air quality. Use it alongside your copy of ANSI/ASHRAE Standard 62.1-2016. In addition to offering immediate access to the content, the PDF download of this standard presents selected graphics in color for enhanced readability.

Introduction to Radar Using Python and MATLAB

[Artech House](#) This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

Rapid Prototyping of Digital Systems

A Tutorial Approach

[Springer Science & Business Media](#) **Rapid Prototyping of Digital Systems, Second Edition** provides an exciting and challenging laboratory component for an undergraduate digital logic design class. The more advanced topics and exercises are also appropriate for consideration at schools that have an upper level course in digital logic or programmable logic. Design engineers working in industry will also want to consider this book for a rapid introduction to FPLD technology and logic synthesis using commercial CAD tools, especially if they have not had previous experience with the new and rapidly evolving technology. Two tutorials on the Altera CAD tool environment, an overview of programmable logic, and a design library with several easy-to-use input and output functions were developed for this book to help the reader get started quickly. Early design examples use schematic capture and library components. VHDL is used for more complex designs after a short introduction to VHDL-based synthesis. A coupon is included with the text for purchase of the new UP 1X board. The additional logic and memory in the UP 1X's FLEX 10K70 is useful on larger design projects such as computers and video games. The second edition includes an update chapter on programmable logic, new robot sensors and projects, optional Verilog examples, and a meta assembler which can be used to develop assemble language programs for the computer designs in Chapters 8 and 13.

Alone

[Sourcebooks, Inc.](#) This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

And There Was Light

The Extraordinary Memoir of a Blind Hero of the French Resistance in World War II

[New World Library](#) The book that helped inspire Anthony Doerr's *All the Light We Cannot See* An updated edition of this classic World War II memoir, chosen as one of the 100 Best Spiritual Books of the Twentieth Century, with a new photo insert and restored passages from the original French edition When Jacques Lusseyran was an eight-year-old Parisian schoolboy, he was blinded in an accident. He finished his schooling determined to participate in the world around him. In 1941, when he was seventeen, that world was Nazi-occupied France. Lusseyran formed a resistance group with fifty-two boys and used his heightened senses to recruit the best. Eventually, Lusseyran was arrested and sent to the Buchenwald concentration camp in a transport of two thousand resistance fighters. He was one of only thirty from the transport to survive. His gripping story is one of the most powerful and insightful descriptions of living and thriving with blindness, or indeed any challenge, ever published.

Undersea

[Booktrope Editions](#) In a world flooded and irradiated by a nearly forgotten cataclysm from generations passed, all that remains of civilization clings to life in two war-torn, city-sized submarines. For fifty years, the only peace between them had come from separation. Now, young council woman Ralla Gattley has uncovered mysteries that will bring these two factions face-to-face, initiating a series of events that will forever change their undersea world. She didn't expect to meet Thom Vargas, a bored fisherman and aspiring drunk who merely wants to climb one rung on the social ladder. Little did he know that single step may well put the fate of the world in his hands.

Radar Instruction Manual

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of

plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

Just Like Being There

In 1986 Frank Davis wrote his first poem. His thoughts were of our attitudes toward the Indians and how we infringed on their territories and lives. Most movies depict the Indian as bad and we were led to believe they were our enemies. Reading more realistic books gave him a different view. In many instances the Indians were friendly and helped pioneers in stress. In two of his poems he brings out his own version of their real struggles of the invasion of the white man, to be out numbered and controlled in a no-win situation. Then his thoughts of his childhood and memories of growing up, his slant on life and visions in a folklore atmosphere. His love and feelings of life and mother nature, to read his poetry will acquaint us with the Inner person and will remind us of ourselves in many ways. His first twenty poems were recorded and a friend listened to that first tape and exclaimed, 'Frank, it's just like being there,' hence the name Just Like Being There. In 1993 he married his best friend and was inspired to try writing lyrics to show his true colors to her. She is his biggest fan and finally someone to add rhythm to his life. Maybe some time in the future, one or two of his lyrics will be put to music.

Micro-hydro Design Manual

A Guide to Small-scale Water Power Schemes

Intermediate Technology Micro-Hydro Design Manual has grown from Intermediate Technology's field experiences with micro-hydro installations and covers operation and maintenance, commissioning, electrical power, induction generators, electronic controllers, management, and energy surveys. There is an increasing need in many countries for power supplies to rural areas, partly to support industries, and partly to provide illumination at night. Government authorities are faced with the very high costs of extending electricity grids. Often micro-hydro provides an economic alternative to the grid. This is because independent micro-hydro schemes save on the cost of grid transmission lines, and because grid extension schemes often have very expensive equipment and staff costs. In contrast, micro-hydro schemes can be designed and built by local staff and smaller

organizations following less strict regulations and using 'off-the-shelf' components or locally made machinery.
