BRINGING LEADERSHIP TO LIFE IN HEALTH: LEADS IN A CARING ENVIRONMENT

A NEW PERSPECTIVE

Springer Science & Business Media Globally, the health sector faces significant demands for reform and improvement to meet the needs of the 21st Century. To achieve that goal, highly sophisticated and capable leaders are required across all dimensions of the health system. This book describes the key challenges that demand reform, why better leadership is the source code for better system performance, and the issues that stand in the way of getting that leadership. It includes substantive treatment of the modern democratic challenges that healthcare leaders face; and the essence of what it means to be a leader in today's world. The essence of leadership itself is described, and the case made for the need for people to use the workplace as the place to develop leadership rather than relying solely on formal programs. It will also outline a self-directed learning process that any individual leader—citizen, clinician, or senior executive—can use to develop their own leadership capability, and thus become more active as a leader of change. This book addresses the need for leaders to think on a system-wide scale. A second part of the book focuses primarily on the Canadian Health system and LEADS in a Caring Environment capabilities framework, and the link between LEADS and frameworks in Australia and the UK. LEADS was developed through a partnership between members of the Healthcare Leaders Association of British Columbia and the Canadian College of Health Leaders, the Canadian Health Leadership Network and Royal Roads University. Currently it is stewarded by a not-for-profit collaboration that has endorsed LEADS as an evidence-informed set of national expectations for Canadian health leaders. LEADS has been endorsed by many health organizations in almost all provinces in Canada as a foundation for their talent management programs in leadership (development and succession planning). The book will address the research foundations for the LEADS framework; how it was developed; the framework's contents; its congruence with other national frameworks, and how LEADS can be used as a model to envisage and plan change.

THE CAMBRIDGE INTERNATIONAL HANDBOOK OF LEAN PRODUCTION

DIVERGING THEORIES AND NEW INDUSTRIES AROUND THE WORLD

Cambridge University Press This handbook focuses on two sides of the lean production debate that rarely interact. On the one hand, management and industrial engineering scholars have presented a positive view of lean production as the epitome of efficiency and quality. On the other hand, sociology, industrial relations, and labor relations scholars focus on work speedups, management by stress, trade union positions, and self-exploitation in lean teams. The editors of this volume understand the merits of both views and present them accordingly, bridging the gaps among five disciplines and presenting the best of each perspective. Chapters by internationally acclaimed authors examine the positive, negative and neutral possible effects of lean, providing a global view of lean production while adjusting lean to the cultural and political contexts of different nation-states. As the first multi-lens view of lean production from academic and consultant perspectives, this volume charts a way forward in the world of work and management in our global economy.

INTERNAL COMBUSTION ENGINES

PERFORMANCE, FUEL ECONOMY AND EMISSIONS

Woodhead Publishing This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO₂ emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical

MODULAR SYSTEMS FOR ENERGY USAGE MANAGEMENT

"...[a] very unique book that integrates benefits of modular systems for enhanced sustainability to meet the global challenges of rapid and sometimes uncontrolled industrialization in the 21st century."--Pinakin Patel, T2M Global This book examines the role of the modular approach for the back end of the energy industry--energy usage management. It outlines the use of modular approaches for the processes used to improve energy conservation and efficiency, which are preludes to the prudent use of energy. Since energy consumption is conventionally broken down into four sectors--residential, transportation, industrial, and commercial--the discussions on energy usage management are also broken down into these four sectors in the book. The book examines the use of modular systems for five application areas that cover the sectors described above: buildings, vehicles, computers and electrical/electronic products, district heating, and wastewater treatment and desalination. This book also discusses the use of a modular approach for energy storage and transportation. Finally, it describes how the modular approach facilitates bottom-up, top-down, and hybrid simulation and modeling of the energy systems from various scientific and socioeconomic perspectives. Aimed at industry professionals and researchers involved in the energy industry, this book illustrates in detail, with the help of concrete industrial examples, how a modular approach can facilitate management of energy usage.

THEBES

A&C Black I mean, what is Thebes? A theocracy? No. A meritocracy? Certainly not. A monarchy? Kind of. A patriarchy? Less and less so. Thebes is many things, and to revolutionise that? Well, how? From Oedipus to Antigone, the story of Thebes remains a fascinating exploration of fate, morality and chaos, two and a half thousand years after the saga was originally written. The first domino falls as Oedipus realises he has unwittingly fulfilled a cruel and unusual prophecy. As control of Thebes is handed to Creon, his sons fight each other for the kingdom and his daughter Antigone is determined to serve the honour of her family to the bitter end. This version weaves together Sophocles and Aeschylus to present the full, visceral and bloody account of the Oedipus dynasty.

MARINE DIESEL ENGINES

MAINTENANCE, TROUBLESHOOTING AND REPAIR

Adlard Coles Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

NEW GENERATION OF ELECTRIC VEHICLES

Important factor in political decision-making is a public opinion as well. Therefore, it is very important to raise global ecological awareness and wider public education regarding ecology.
