Waiting Period

A Novel

Open Road Media **A blood-chilling excursion into the twisted mind of a serial killer by the acclaimed author of Last Exit to Brooklyn, Hubert Selby Jr. When the oppressiveness of his memories becomes too hard to bear, a traumatized veteran decides to die. But he grows impatient during the legal waiting period to purchase the gun that will end his sad life. Then he grows angry, resentful of those he blames for his misery and those he feels simply don't deserve to live. Suddenly a man with no future has a new purpose and a new role as avenging angel. As he spirals deeper into the darkest regions of his twisted imagination, his grisly obsession will give him a reason to live, propelling him relentlessly forward on his great mission to cleanse the dirty city of the unworthy. A brilliant and terrifying nightmare from the author of the critically acclaimed classics Last Exit to Brooklyn and Requiem for a Dream, Hubert Selby Jr.'s Waiting Period views a grim modern world of pain and injustice through the eyes of a maniac whose mind is rapidly deteriorating. A dark and haunting work of raw, savage power, it provides further testament to the greatness of one of America's most original contemporary literary artists. This ebook features an illustrated biography of Hubert Selby Jr. including rare photos from the author's estate.**

Integrative Environmental Medicine

Oxford University Press "At no other time in human existence has there been so many environmental changes. Over 87,000 chemicals are now commercially available in the U.S., almost all of which have not been tested for safety, particularly in young children and the growing fetus. The number and quantity of chemicals has continued to increase since World War II-- and so too has the incidence of many chronic health problems, such as Type 2 Diabetes, obesity, thyroid disease, asthma, allergy, autoimmune disease, autism, ADHD, and several cancers. Many studies have revealed that exposure to chemicals and radiation in our everyday environment may increase risk for these conditions. **Integrative Environmental Medicine** examines the history and changing landscape of our environment in the U.S. and shares up-to-date research and information on ways to reduce exposures and reduce health risks. This text explores the unique properties of many chemicals and their ability to deceive the human body's normal workings, affecting everything from thyroid and autoimmune disease risk, to cancer development, to developmental issues in children, and even the development of diabetes and weight gain through gut bacteria manipulation. We discuss topics of improving regulations and appropriate testing for chemicals, remediation of environmental catastrophes, and designing healthier products for the future. Finally, we discuss best practices for clinicians to ascertain exposure history and teach patients how to avoid harmful exposures and help their body eliminate contaminants through better dietary and lifestyle practices. Throughout this book, we share vetted, practical resources and tools--including websites, phone apps, physician and patient hand-outs--to help healthcare practitioners facilitate healthier choices for themselves and their patients. This text is unique in that it offers tangible, practical information that can easily be integrated into the daily work flow of patient clinical care; websites, phone apps, physician and patient handouts and printable lists"--Provided by publisher.

Psychosocial Health, Work and Language

International Perspectives Towards
Their Categorizations at Work

Springer This volume deals with the construction of categorizations of health at work on the basis of individuals' perceptions and analyses of the psychosocial health effects at their work. The volume approaches the subject from the point of view of those who have experienced psychosocial risks at work, either by being under constraints themselves or by being witness to such constraints. Each chapter sheds light on their representations by examining how the individuals label these constraints. The book compares official categorizations of psychosocial health effects of work to unofficial categorizations, built or expressed. It shows how taking into account subjective narratives may reinforce existing strategies. By

giving a central place to language in the analysis of the representations of psychosocial health at work, the volume provides additional information about the various prevention and coping strategies that can be used for dealing with the issue. Beyond some international comparisons, the book covers various national case studies, including in Argentina, Belgium, Canada, Chechnya, France, Germany, the Netherlands, Japan, and Russia.

NACA Documents Database Project

The plan to get all the National Advisory Committee on Aeronautics (NACA) collection online, with quality records, led to the NACA Documents Database Project. The project has a two fold purpose: (1) to develop the definitive bibliography of NACA produced and/or held documents; and (2) to make that bibliography and the associated documents available to the aerospace community. This study supports the first objective by providing an analysis of the NACA collection and its bibliographic records, and supports the second objective by defining the NACA archive and recommending methodologies for meeting the project objectives. Multiaccess, Mobility and Teletraffic in Wireless Communications: Volume 5

Springer Science & Business Media **The convergence of wireless communication and the Internet is one of the strongest emerging markets in the telecommunications industry. This book consists of a compilation of papers on key issues related to 3G and 4G wireless communications and wireless access to next generation Internet (NGI). Included in Multiaccess, Mobility and Teletraffic for Wireless Communications: Volume 5 are new results on space-time access schemes that can dramatically increase the achievable bit rates of wireless systems, perhaps approaching bandwidth efficiencies in the order of 10 bits/s/Hz. The book also considers broadband wireless access to NGI. Effective management of radio resources in wireless systems is necessary for high spectral efficiency and to support mobility. This book treats issues relating to handoff and channel assignment in cellular frequency reuse systems. In order to achieve quality of service (QoS) expectations in a dynamically changing wireless environment, effective error and QoS control protocols are needed. To guarantee fairness in the access to resources, medium access control (MAC) protocols are needed. Optimization of network resources traffic and mobility models are also needed, along with effective call admission control strategies. All of these topics are covered herein. Finally, this book considers future 3G and 4G wireless systems and highlights the critical challenges that must be overcome to make these systems a commercial reality. Multiaccess, Mobility and Teletraffic for Wireless Communications: Volume 5 is an important book for researchers, students and professionals working in the area of wireless communications and mobile computing.**

Emerging Vectors of Narratology

Walter de Gruyter GmbH & Co KG **Narratology** has been flourishing in recent years thanks to investigations into a broad spectrum of narratives, at the same time diversifying its theoretical and disciplinary scope as it has sought to specify the status of narrative within both society and scientific research. The diverse endeavors engendered by this situation have brought narrative to the forefront of the social and human sciences and have generated new synergies in the research environment. **Emerging Vectors of Narratology** brings together 27 state-of-the-art contributions by an international panel of authors that provide insight into the wealth of new developments in the field. The book consists of two sections. "Contexts" includes articles that reframe and refine such topics as the implied author, narrative causation and transmedial forms of narrative; it also investigates various historical and cultural aspects of narrative from the narratological perspective. "Openings" expands on these and other questions by addressing the narrative turn, cognitive issues, narrative complexity and metatheoretical matters. The book is intended for narratologists as well as for readers in the social and human sciences for whom narrative has become a crucial matrix of inquiry.

Marcella Gerrard's Galway Estate, 1820-70

'Lawful Extermination of Tenantry'

Four Courts Press Ltd This book explores the transition that took place in a landed estate in the barony of Killian, east Galway, in the years 1820-70. It examines how the landlord, John Netterville Gerard, reacted to the social and economic changes which took place before, during, and after the Famine. The marriage of John Gerrard to Marcella Netterville in 1822 heralded a different approach to the management of the estate. His efforts to convert the estate from a tillage-based rental property to a grazing operation rendered large numbers of tenants surplus to requirements. His

sole method of dealing with these surplus tenants was eviction and destruction of dwellings. The widespread publicity generated by the Gerrard evictions at Ballinlass in 1846 is examined in some detail, as it offers the tenants' perspective of the clearances and also the public defense which the landlord felt compelled to offer. The fate of the estate, in the aftermath of the deaths of John and Marcella Gerrard, and its subsequent division among three distant relatives, is also studied.
